

# Hello, Quarto!

Donghwi Nam

2024-11-07

## First things first

```
# To start off with Quarto
install.packages("tidyverse")
install.packages("palmerpenguins")

# For rendering pdf file
install.packages("tinytex")
tinytex::install_tinytex()
```

## Making a pdf document

We have changed the *format* field in the YAML heading to **pdf** to make the output file in pdf format. Note that you may need additional packages installed for rendering to pdf file.

```
library(tidyverse)
data(iris)
```

## Iris data

The `iris` data contains measurements of the variables sepal length and width and petal length and width, respectively, for 150 flowers from each of 3 species of iris.

For more information, you may execute `help(iris)`.

You can insert an image by following command.

Figure 1: *Iris sanguinea* (By Alpsdake - Own work, CC BY-SA 3.0, <https://commons.wikimedia.org/w/index.php?curid=19823709>)

Data Visualization of Iris data
